HeyCoach

ABOUT US

Overview

HeyCoach is dedicated to simplifying your growth journey by providing personalized guidance and support, ultimately helping you secure opportunities in top-tier product companies.

In the exclusive Super 30 program the most passionate and committed candidates are selected from a pool of applications. They are coached for 4 months on everything that is required to get into top product-based companies like **Google, Meta, Amazon, Apple, Microsoft, Flipkart & more.**

Super 30 Program

HeyCoach is known for its flagship "Super 30" program. They select 30 aspiring developers to train them on DSA & System Design.

Signature Frameworks

Remain one step ahead with access to exclusive tools like DSA MindMap, DSA Visualiser, and the Great Pyramid Test.

High CTC Achievements

A peak CTC of 98 LPA, showcases the program's effectiveness. The average CTC learners have been prepared for is 27 LPA.

Professional Coaches

Learn directly from top-tier industry experts hailing from tech giants like Google and Amazon in our cutting-edge program.

Meet the FOUNDERS

Pratik Kapasi

Worked on the core Google Search codebase improving the efficiency and reliability of the search engine.

Built & led successful scaling of Razorpay products like Route & Partners used by a million users today.

Aditya Kamat

Managed 3+ petabytes of data as Sr. SRE, building critical data infrastructure to support features like *People you may know* and *Jobs you may be interested in*.

Built tech to handle more than a million domain registration requests.

Course

ELIGIBILITY

The aspirant needs to be hands-on with coding in any one programming language.

All academic background professionals are welcome to apply for the Super 30 squad.

The aspirant should be passionate about getting into a top product-based company.

Exposure to Coding Platforms like LeetCode & HackerRank is a plus but not mandatory.

Process

1

Counselling

Our dedicated Learning Consultants will screen your profile and guide you to understand more about our program.

2

Eligibility Form

Mention your tech skillsets, total work experience (if any), past projects & write a fantastic SOP to impress us!

3

Interview

The screening panel will review the forms & may invite you for interview. Tell us what really drives you & we'll listen!

Course

STRUCTURE

Advance Data Structures

MONTH 2

Moving towards advanced data structure concepts, learn essential topics frequently asked in tech rounds.

Interview Preparations

MONTH 4

Improve interview skills via company specific mock interviews covering LLD & HLD. Also, practice interview questions on designing Google Maps & Uber at scale.

1

Basic Data Structures

MONTH 1

Start with learning the basic data structures & algorithms which will act as building blocks as you move forward.

2

System Design

MONTH 3

Finishing up with your DSA preparation, start your system design preparation with low-level system design.

3

4

Placement Assistance

NEXT 12 MONTHS

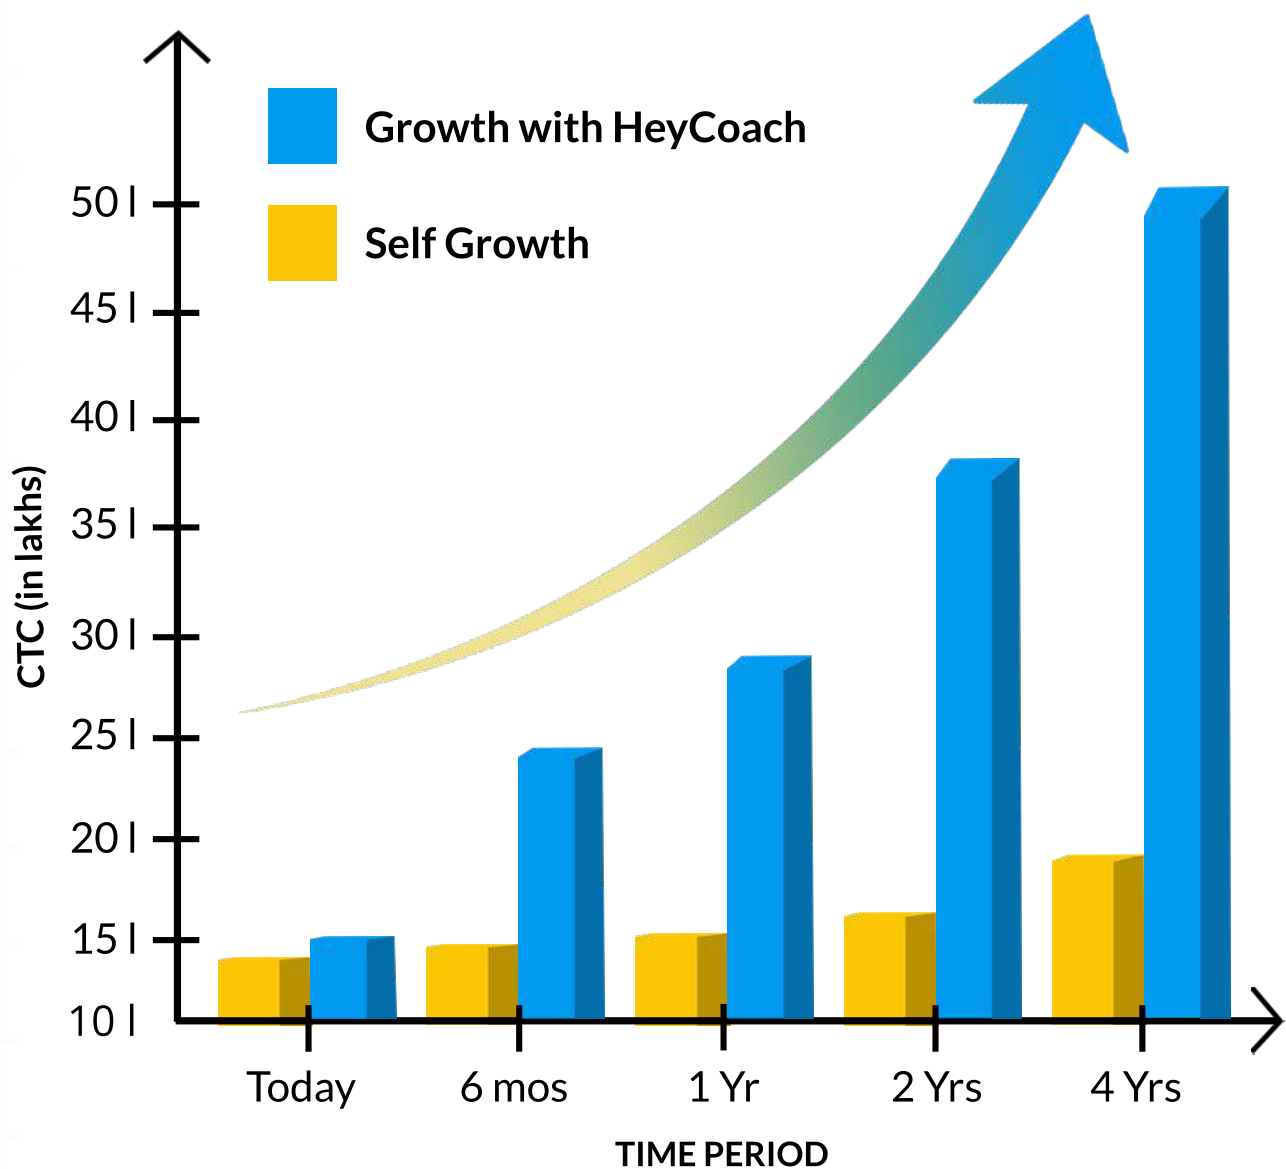

We will be in touch with you for the next 12 months to help you find your dream workplace through referrals.

5

Growth

PROJECTION

Learn more about your professional advancements by knowing your probable career growth trajectory using our exclusive growth projection framework. Gain a clear vision of your future successes and milestones, enabling a strategic approach to your career development.

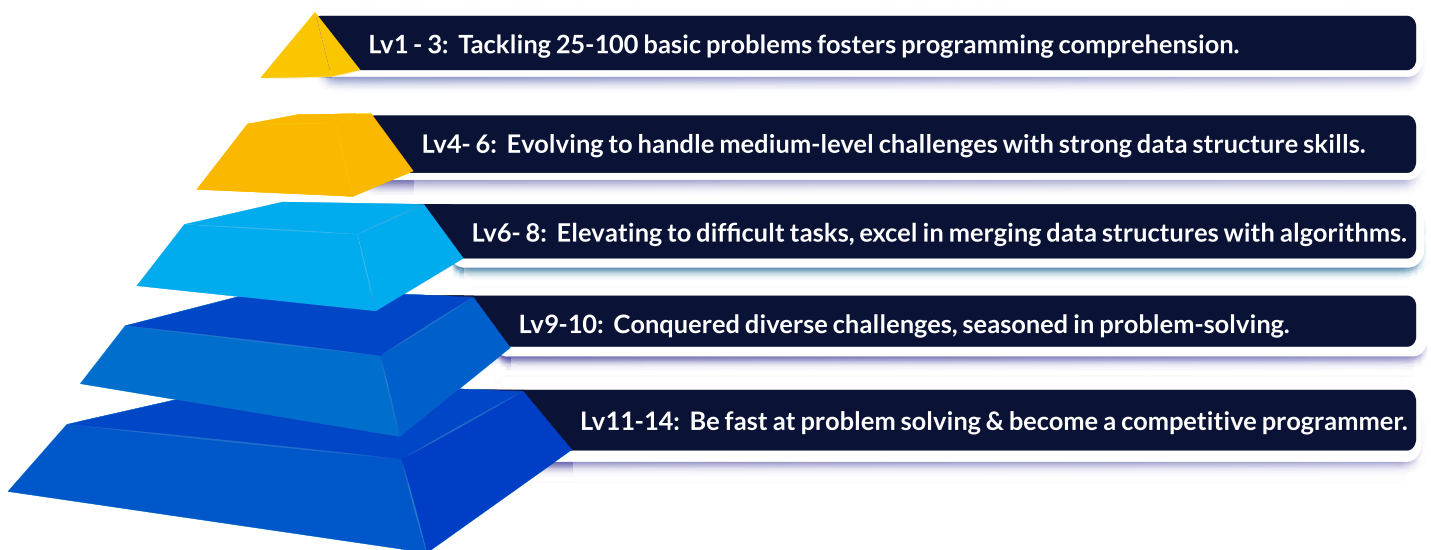

THE GREAT PYRAMID

"A Journey of Growth, One Level at a Time"

Overview

Drawing from our in-depth research on Interview Rubrics from over 50 leading product-based tech firms and their corresponding pay scales, we have carefully mapped out the traits that need to be showcased during interviews. This comprehensive framework forms the foundation of TGP.

Framework

The journey to MAANG and other Top-Tech Product Companies has been divided into 14 levels beginning from Level 1 to Level 14. Every week each learner will undergo a rigorous mock interview test to assess their current level. Every level they clear will give us a benchmark of the type of companies the learner can target and the amount of extra effort the learner needs to put in. It will help to identify areas of weakness.

THE GREAT PYRAMID

Results

At every level candidates get a clear understanding of their performance potential in specific company interviews.

- For example, if a learner successfully clears Level 1 they will be eligible to clear interviews with Infosys and similar companies.
- At Level 5 they will be eligible to clear interviews with IBM and similar companies. At Level 8 they will be eligible to clear interviews with BookMyShow and similar companies.
- At Level 11 they will be eligible to clear interviews with RazorPay and similar companies.
- Finally if they're able to clear Level 14 they will be eligible to clear interviews with MAANG and Top Product Companies.

Speak with our learning consultants to understand your current level and the roadmap that you can take to achieve a role in your dream company.

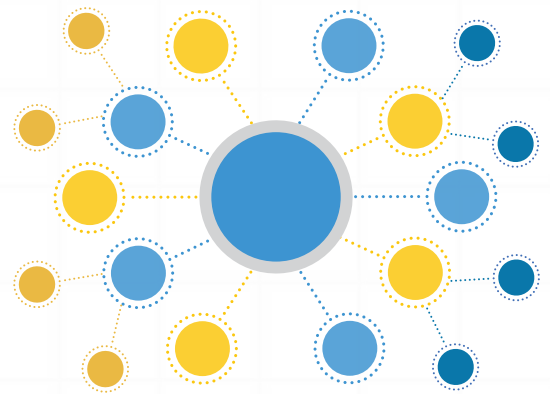

DSA

MINDMAP

"Approaching any DSA problem is now simplified"

Overview

After conducting interviews with over 30 engineers from MAANG, it was found that their preferred approach to solving complex DSA problems was to identify patterns. In response, a specialised tool was developed by the team to assist our learners in this process.

Framework

Every complex programming question can be broken down into multiple subcases. Each subcase has a specific approach with which it can be solved. Irrespective of the number of questions a learner solves, if they are able to successfully identify which approach to apply the solution to the question can be achieved. The MindMap tool provides this very approach to these complex problems.

Results

Upon implementing the MindMap tool, our learners experienced a significant reduction in the time spent on Hard questions, with the average time decreasing from 50 minutes to less than 22 minutes!

Success STORIES

HeyCoach was instrumental in helping me switch my company to product-based RazorPay. Their special focus towards Competitive Programming and mock-interviews gave me the edge required to crack the final interview.

Monark Dedakiya

Software Development Engineer

The personalised course structure helped me become better in various aspects like competitive programming, project development & resume building. Overall, the Super 30 program has been a complete game changer for me.

Vinita Rahul

Software Engineer

HeyCoach not only taught DS & Algorithms but also provided resume reviews, mock interviews & sessions with industry experts. I highly recommend HeyCoach to anyone who wants to get into those awesome tech companies!

Bhavya Karia

Full Stack Engineer

Fee

STRUCTURE

EMI starts at ₹5,650 per month

Total course fee **₹1.58L** (all inclusive)
